

Vaccine Policy

Bee Well Pediatrics firmly believes in the effectiveness of vaccines to prevent serious and life-threatening disease in our patients and to avoid the spread of such illnesses in our community. As Pediatric Providers, we firmly believe that vaccines are safe. We firmly believe that public policies excluding unvaccinated children from school are appropriate in the school setting and must be part of our office policy as well. We care for some complicated children at Bee Well Pediatrics; children for whom a vaccine preventable illness could result in death.

At Bee Well Pediatrics, we expect parents to immunize according to the schedule recommended by the American Academy of Pediatrics and listed on our website for your review. Effective January 2nd, 2025, we will no longer welcome new patients who refuse all vaccines. If parents have the intent to be fully immunized via an alternate schedule, they are warmly welcomed if the following criteria are met:

- 1. Immunizations are initiated by 6 months of age.**
- 2. By 2 years of age, the child has received all vaccines that are recommended by the American Academy of Pediatrics for daycare entry.**
- 3. By 5 years of age, the child has received all vaccines recommended by the American Academy of Pediatrics for school entry.**

Failure to meet our basic vaccination goals as listed above could result in dismissal from our practice and we will ask you to find another office that shares your views. We do not keep a list of such Providers, nor would we recommend any such Provider.

We recognize that vaccinating your child may be a very emotional subject for some parents. The goal of this policy is to have the healthiest patients and community and not to cause parental distress. There are many websites that contain misinformation about vaccines. We have done the research and reviewed all the controversies and hold firmly that vaccinating children may be the single most important health-promoting intervention that we perform as Pediatric Providers. We encourage you to discuss your concerns with us. Thank you for trusting us with the care of your child.
